Jobs and output

Create the directory before submitting. Keep the printed job number.

```
mkdir -p logs
sbatch --partition=rome --cpus-per-task=1 \
  --job-name=python-check \
  --output='logs/%x-%j.out' \
  --error='logs/%x-%j.err' python.sh
```

%x = job name %j = job ID %A_%a = array job and task

```
squeue --me
sacct -j JOBID --format=JobID,State,ExitCode
seff JOBID
```

Choose 1 core for VS Code. Stop its session when finished. No email notifications.
